

Creative & Delicious Smoothies

To Help You Enjoy Coach Fuel Every Day and Boost Your
Needed Daily Protein and Amino Acid Intake

TheExerciseCoach®

We hope you will find a way to enjoy at least one Coach Fuel Smoothie each day to boost your protein and amino acid intake. Did you know that most people are not even close to their dietary optimal protein intake, and barely even close to their dietary minimal intake needs? By adding two scoops of Coach Fuel Protein Powders (your choice as to which variety), you can change this problem and get on your way to enhancing your muscle, your workout, your strength, and thus, your longevity and healthy aging.

SMOOTHIE INSTRUCTIONS

Blend all ingredients in a powerful blender (Vitamix or Nutri-Bullet type). Add water and/or ice to your desired consistency. Pour into a smoothie bottle or have fun and use a specialty glass or container! Drink slowly and enjoy!

- » For all recipes, you can substitute the type of unsweetened nut milk to your preference. We generally list the one that coordinates, but substituting is perfectly fine. These include unsweet almond, coconut, cashew, macadamia, or any nut blend. We do not recommend oat milk which has an effect of raising your blood sugar.
- » For all recipes, you may add in additional water and/or ice to make the smoothie to the consistency you prefer (thick, milky, or watery).
- » We recommend adding in additional greens or veggies to any of the recipes. Have fun trying different combinations to make these more of a meal and nutritional powerhouse! Try kale, spinach, carrots, beets, broccoli, etc. This will help tremendously with blood sugar control.
- » You can also try adding chia seeds, flax seeds, spices, etc. to add some flare and boost some of the nutritional values.
